INTRODUCTION

National seminar on “Dravidian Herbal Heritage and Modern Clinical System” organized by the Dravidian University, Department of Biotechnology, Srinivasa vanam, Kuppam, A.P., India from 24-25 Feb-2020.

The aim of the Seminar is to provide a platform for eminent researchers, academicians, physicians, traditional medicinal practitioners, manufacturers & exporters of herbal products, members from the corporate sector, marketing consultants, farmers and NGO's from all over the India.

ABOUT THE UNIVERSITY

The Dravidian University was established by the Government of Andhra Pradesh through a Legislature Act (No.17 of 1997) at Kuppam, Andhra Pradesh, India. The Dravidian University is located in a linguistic jurisdiction in the south-western tip of Andhra Pradesh at Kuppam, 8 k.m. away from Tamil Nadu and 4 k.m. from Karnataka, a region historically known for its integrated character in terms of language and culture. Located in the Gudupalle Mandal, Chittoor District, A.P., the campus has a sprawling, picturesque and serene setting spreading over 1093 acres with greenery and impressive hillocks presenting a typically pollution-free rock garden. It is located at 750 MSL. The temperature during November ranges from 24-29 degree Celsius.

The international perspective of Dravidian research, modern perceptions of Higher learning and regional demands of a backward rural area – three distinctly different dimensions – have fused into one that led to the formation of Dravidian University, multiplying its obligations and responsibilities by manifold, much different from other universities. It is envisaged as a collaborative venture of all the four Southern states with a motto of integrating the different linguistic groups of the Dravidian family, which have made rich historical contributions to the cultural mosaic of the country.

Kuppam is on the main railway line from Chennai to Bangalore. Kuppam is well connected with Krishnagiri, Kolar Gold Fields and Tirupati by road. Kuppam is also very near to Bangalore and Chennai international air-ports.

The School of Herbal Studies and Naturo Sciences developed 10 acres of medicinal plants garden in the University campus for conducting advanced research with animal models.

SCOPE OF THE SEMINAR

- ☞ Cultivation, propagation of medicinal and aromatic plants
- ☞ Biotechnological approaches on medicinal and aromatic plants
- ☞ Applications of medicinal plant products on animal systems
- ☞ Conservation of Herbal resources
